

Plant Belles LAUNCH Spring 09

Spring is a time to consider plant support. The NEW Plant Belles will protect and support needy perennials, from the beginning of the growing season.

This year at Malvern you will see the new Plant Belles launched to the gardening public. Plant Belles are grow-through plant supports with a difference. Flower Power garden products have designed a range of ornate Plant Belles, that gardeners will actually want to remain visible. Making a gentle statement in the garden, these elegant wire frames look great all Winter, crusted in frost or dripping with rain. Plant Belles protect young Spring growth emerging from beneath, before providing much needed support to plants as they reach the heady heights of the flowering season.

Used by the National Trust and RHS Rosemoor in Devon, Plant Belles are designed and handcrafted in England. Inspired by the Arts & Crafts movement of the 20th Century and styled with the 'old English cottage garden' in mind, they have a rusted iron finish that sits naturally and majestically in the border.

To find out more about the full range of Plant Belles visit the website at www.plantbelles.co.uk, or contact Jenny at Flower Power Garden Design on 01363 82413.

'Flower Power' will be exhibiting 'Plant Belles' at the RHS Spring Gardening Show at Malvern, May 7th - 10th 2009, at the Three Counties Showground, Malvern, Worcestershire.
